## BEFORE YOU BEGIN

Please check to ensure you have all of the below items before you begin installation of your product.

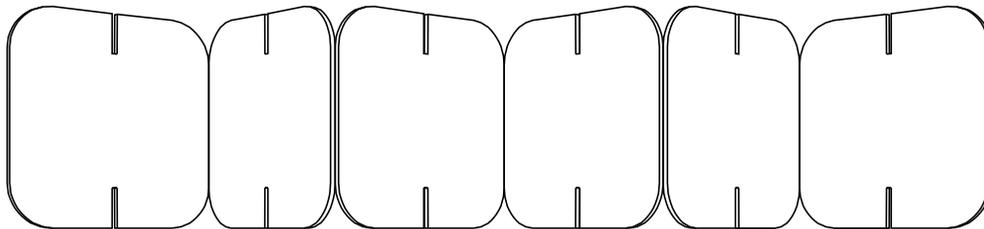

### Items Supplied by Acoustics America

Check that the quantities and colors of your room dividers match your order receipt.

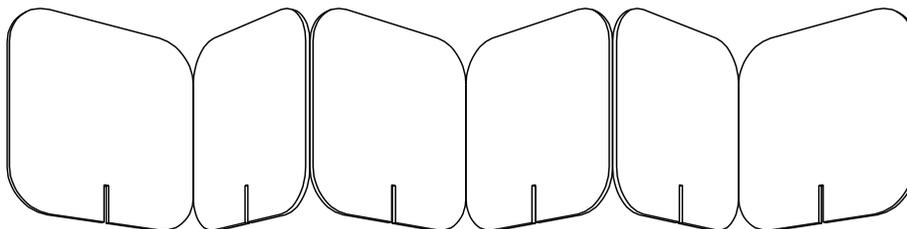

- (1) base strip with flat edges on bottom and rounded edges on top

- (4) strips with rounded edges and slots on top and bottom

- (1) top strip with rounded edges on top and slots on the bottom only

If you are missing any required items from your order,  
contact us at: <https://acousticsamerica.com/orderissue> or call us at 1-800-569-4907.

The room divider consists of 6 folded strips. Each strip is comprised of (6) 16 sq. inch panels.

Each strip features folding hinges: V-groove on one side and a smooth surface hinge on the other.

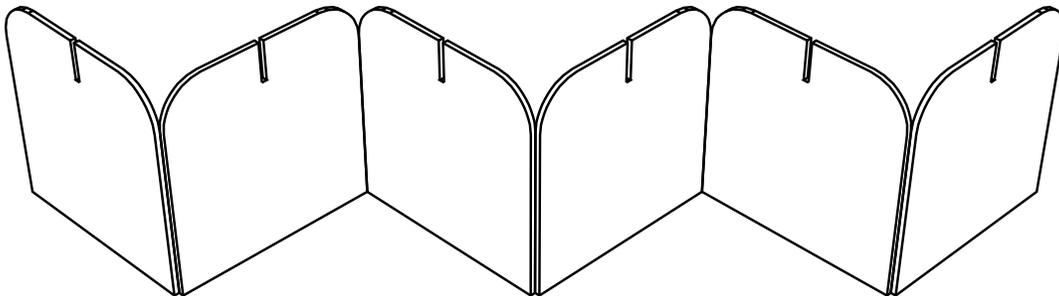

The strips have interlocking slots allowing them to stack into a rectangle shape.

Assembled, it measures 5 ft. 5 in. in height, 5 ft. 9 in. wide and 11 in. deep.

## **STEP 1**

Set up the base strip. Stand base strip upright in an “S” shape or roughly 90-degree angles with flat side on the floor as shown in photograph below (flat sides on floor and round corners facing upward).

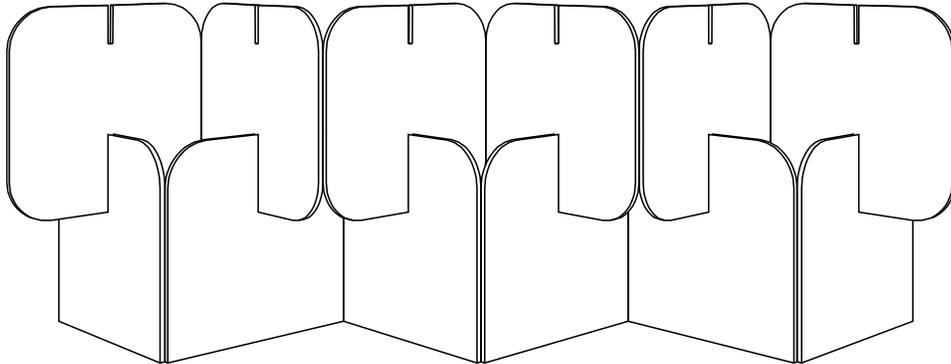

**TIP:** Base strip provides a stable base on the floor.

---

## STEP 2

Attach the second strip. Using strip with round edges and slots on top and bottom, align bottom slots of strip 2 with top slots of the base strip, alternating the direction of the “S” shape or 90-degree angle. Once all slots are aligned, press firmly to secure.

## STEP 3

Repeat step 2, but alternate the direction of the “S” shape or angle until all rows are stacked and locked together.

**TIP:** For a uniform look, ensure all strips face the same direction, with flat fronts aligned on one side.

**TIP:** Apply firm pressure to secure panels in place. In order to prevent damage, avoid using excessive force.
