

DESCRIPTION

Add dimension, and acoustic performance to your space with PET Acoustic Waffle Baffles — a suspended, interlocking acoustic kit designed to enhance sound quality and architectural aesthetics. These versatile acoustic ceiling baffles reduce echo and ambient noise, creating a quieter, more comfortable environment for focus and communication.

Ideal for open offices, conference rooms, educational spaces, and large commercial interiors, waffle baffles deliver high-impact visual design while improving acoustics in spaces with high or exposed ceilings.

Customize your acoustic ceiling baffle with 16 colors and your choice of square or radiused edges. Mix and match your baffles to create a dramatic ceiling feature tailored to your brand or design intent.

HIGHLIGHTS

- Dampens background noise
- Easy installation (no tools required)
- Visually stunning decor

SUSTAINABILITY

- 100% recyclable
- 60% post consumer recycled content (recycled water bottles and similar PET material)
- Low VOC
- Odorless, non-toxic and safe to touch
- Highly resistant to moisture and humidity
- Resistant to fungi and bacteria

SPECIFICATIONS

Material

Acoustical Felt/Polyester

Thickness

10mm (.394")

Size

48" L x 48" W

Weight

12lbs radius / 13lbs square

PET COLORS

PERFORMANCE			
Mounting Method ASTM C423 / ASTM E795	NRC	SAA	Sabin/S.F
A	0.35	0.35	.35-.39

The specific mounting method used during testing can significantly affect the sound absorption data and the resulting Noise Reduction Coefficient (NRC) or Sound Absorption Average (SAA) ratings. Therefore, it is crucial to compare product performance data only when the same test method and mounting type are used, and the mounting type should be as close as possible to the real-world installation method.
